

*Your neighbors are studying the feasibility of forming a new city in the area between Milwaukie and Gladstone.*

## **Friends of Local Control Mission Statement**

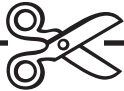

The purpose of this project is to study the feasibility of forming a city in the area bordered by the cities of Gladstone and Milwaukie, the Willamette River and Oatfield Ridge. The group believes that with the significant changes coming to the area, now is the time to explore the feasibility of forming a city. We welcome all of our neighbors to join us in this citizen-driven effort.

## **WE NEED YOUR HELP**

There is a lot of research that needs to be done to determine the feasibility of forming a city. Friends of Local Control is a group of your neighbors working to provide information about city formation for the community to review. We would like to commission a professionally conducted opinion survey of area residents to find out how they feel about governance, local control and incorporation. Your financial contribution will help get this done. Please make a donation and/or lend your support for this effort.
